

Higher Order Testing Defect Log for Team 10
(Team 10 requested for us to not Volume, Performance, and Stress test)

Defect No.	Defect Description	Defect Severity	Type of Higher-order testing	Test case/Description
1	Have to go back to the home page in order to change username, then user has to rejoin or recreate the hub, rather than being able to change their username in the hub	3	Usability	2.1
2	I automatically get signed in to my default gmail, but if I want to change the email to sign in with, I can't	3	Usability	1.1
3	User has to press back button or home page to "leave" the hub, rather than just pressing a button on the hub page that will allow the user to leave formally	3	Usability	13.1
4	When a song is playing and the admin cancels or removes that song, the song keeps playing until the end	3	Usability	8.2
5	When a song that is playing is canceled, the queue of songs do not continue to play	3	Usability	8.2
6	When a user searches for a song, goes to the queue tab, and goes back to the song tab, the searches do not display unless user searches again	3	Usability	14.1
7	The email should not be the default nickname since that would allow for leak of private information	3	Security	1.1
8	The pin needs to be encrypted so people don't make spam bots that will infiltrate each hub	3	Security	7.4,7.5,7.6
9	The email needs to be encrypted so that is there is a breach in the database the emails won't be	3	Security	1.1
