

Defect Log for Team 10

| Defect No. | Defect Description | Defect Severity | Test Case/ Description |
|------------|---|-----------------|---|
| 1 | Nickname can be longer than 12 characters | 3 | 3.1 |
| 2 | Join and Create Hub buttons are switched | 2 | 3.1 |
| 3 | Voting on song value is bugged, when user clicks upvote when the value is 1, then the song does not go back to 0, like mentioned in the How to use MusiQueue document | 2 | 5.1 |
| 4 | The search button doesn't filter songs from Youtube, shows all types of videos | 3 | 14.2 |
| 5 | When user goes back to homepage to change nickname, nickname doesn't stay changed | 2 | 2.2 |
| 6 | Non-Admin Users can delete songs from the queue | 2 | Log in as a user, and try and delete a song from the queue |
| 7 | Users don't need correct pin to join a hub | 2 | 7.3 |
| 8 | The user that is not the host is able to remove songs from the queue | 3 | 8.3 |
| 9 | Does not display correct hubs based on location | 2 | 10.2 |
| 10 | Hubs that did not toggle the "Allow Location" button still show up in location search | | Click the "Allow Location" button when creating a hub, and login as a user to see if that hub is in the search by location list |
| 11 | "Search By Location" button does not work. | 2 | 12.2 |
| 12 | There is no leave button, so I do not know if I left the hub or not | 2 | 13.1 & 13.2 |
| 13 | User is allowed to make a nickname with whitespaces | 2 | Press the spacebar when creating a |

| | | | |
|----|--|---|---|
| | | | nickname |
| 14 | Unable to make the hub if the length of hub name is less than 3 | 2 | Try and create a hub name of length 1, 2, and 3 |
| 15 | When we reload in the hub page, it won't show anything till we click home or logout. | 2 | Try and reload the page when in a hub |
| 16 | When the last song in the queue is played, the youtube player stays on the admins page and the last song stays in the queue. If that last song is upvoted, or if another song is added to the queue, the last song is replayed | 2 | Wait for last song to end, and either upvote the song or add another song to the queue |
| 17 | When searching for a song, the list of songs that are related to search are appended to the end of the list, rather than replacing the past songs | 3 | Search for a song in the hub, and see if the list is updated |
| 18 | The top item of the queue is removed, rather than the current song. So if the song playing is lower than another song, it will remain in the queue | 2 | The top item of the queue should be the next song playing, not the one to be removed after the song is done |
| 19 | Search button only adds top 7 searches, not 8 | 3 | Searched for songs in the hub. |
| 20 | The create a hub page doesn't give an error message when Hub Pass Pin is invalid | 3 | Tried to input invalid values for the pin and hub name but was not given an error for them. |
| 21 | Admin cannot kick a user in the hub out | 2 | 9.1 |
| 22 | On user side of the program, the user doesn't see the name of the hub once they join the hub, just has Hub: | 3 | Joined a hub that was created by another user and saw the title. |
| 23 | Searching for a hub is not case insensitive, if I have a hub with a name of Hub123, and I search hub123, nothing will show up | 2 | Created a hub with upper case letters and then searched for it using a string with only lower |

| | | | |
|----|--|---|---|
| | | | case letters. |
| 24 | "Recent Hubs" button displays hubs in reverse order. | 3 | Pressed the "Recent Hubs" button, and saw the order they were displayed in. |
| 25 | Hub names can be whitespaces | 2 | Inputted white spaces for the hub name. |
| 26 | The allow location option cannot be updated after the hub is created | 2 | Tried to press the option for allow location and was not able to update this parameter. |
| 27 | Voting on songs as a user does not reorder the queue | 2 | Login as a user, and vote on songs in the current queue |
