<u>Instructions to run (must use a computer with a linux-based OS, eg OSX)</u>

- 1. Follow this tutorial (only isntall node, npm, and mongo)l: https://github.com/rorikata/tutorial MEAN/blob/master/MEAN installation/README.md
- 2. In client folder, first write following command "npm install" and "npm install dev"
- 3. In jwt folder, first write following command "npm install"
- 4. Then in client, run by "npm run dev" and for jwt, run by "npm start"
- 5. You will need to add at least 1 new category, 1 subcategory, and 42 questions to the database before running the game, which can be done in the home tab and add question tab.
- 6. In the game page, you need to reload the page every time before starting the game.
